1 General Instructions

The following pages represent the Invoicing, Receipt, Acceptance and Property Transfer (iRAPT) User Defined Format (UDF) for processing Receiving Report and Energy Receiving Report transactions in iRAPT, including Unique Identification (UID) and Pack Data/RFID information. Please refer to other UDFs to process the following documents: Receiving Report – Pack/RFID Update, Invoice and Invoice 2n1, Cost Vouchers, Progress Pay, Performance Based Payments, Commercial Item Financing, Reparables Receiving Reports, and Reparables Combo.

The Purpose of the Receiving Report:

The Receiving Report_UDF.doc (Receiving Report) transaction should be used for transaction for original sale of items with or without UIIs, repairable items without UIIs, or reparables whose UIIs have not been loaded to the UID Registry.

If all the criteria listed below are met, use the Reparables Receiving Report:

1. The receiving report represents a repair activity – the QA / Acceptance signatures are for the acceptance of the REPAIR of government property hardware.
2. The repaired hardware has been marked with Unique Item Identifiers (UIIs).
3. The UIIs on the hardware have been added to the UID Registry, and loaded with a custody record that indicates the hardware is in the custody of the Contractor.

NOTE: If using a word processor program (i.e. Microsoft Word, WordPerfect, Microsoft WordPad, Microsoft Write, etc.) to create FTP files, the text must first be cut or copied out of the word processor program. It would then be required to be pasted into Microsoft Notepad or another ASCII text editor and saved before sending the data to iRAPT. This converts the text to text-only format and removes the control characters that contain formatting information.

When submitting an attachment for a document, you must submit the attachments first, then the document file(s). Each attachment may only be used for a single document. A single attachment may not be used for multiple documents. If this is necessary, then submit the attachment with a unique name for each document. To avoid potential errors, FTP files and attachments need to be sent to iRAPT in a binary format.

WARNING: Invoicing, Receipt, Acceptance and Property Transfer (iRAPT) is designated for Sensitive Unclassified information ONLY. Do NOT upload classified attachments into iRAPT.

Each UDF layout includes the following:

1. Field Sequential number of the Field contained within the layout record.

-
- | | |
|----------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2. Description | Description of information to be contained within the Field. |
| 3. Min/Max | Minimum/maximum number of characters to be included in the Field. |
| 4. RR | Depicts whether the Field is: <ul style="list-style-type: none"> M – Mandatory – Usage is required. O – Optional – Can be used or not used. C – Conditional – Contingent upon another criteria being met. (Field is not mandatory or optional, e.g. Extension Fields to Department of Defense Activity Address Codes (DoDAAC); use if a DoDAAC is present.)_See Notes Column for specific instructions. N/A – Not Allowed |
| 5. Notes | Contains notations of the Field’s usage or restrictions within iRAPT. |
| 6. Type | Contains the Data Field type, (i.e., Alpha/Numeric, Numeric, Date, etc.). |

In addition, Fields to be included within iRAPT display the Field “Type” to depict the type of value to be included within the Field:

- **N** Integer Numeric Field
- **R** Decimal number. Where value includes decimal, iRAPT requires that decimal point and value be sent: iRAPT will NOT imply or assume decimal points. Examples:
 - 300 will be read into iRAPT as “300”
 - 3.00 will be read into iRAPT as “3”
 - 3.5 will be read into iRAPT at “3.5”
 - Decimal is included as part of Max Value – e.g., R8.2 = 11 characters
- **ID** Identifier
- **AN** Alphanumeric String
- **DT** Date – All Date Fields use format: CCYYMMDD
- **TM** Time – All Time Fields use format: HHMMSS

NOTES:

- All Line Numbers, if used, must be followed by an asterisk (“*”) field separator. Each Field within the line must also be followed by a caret (“^”) field separator unless it is the last Field in the Line Number that contains data.
- Special characters should not be sent to iRAPT via Secure FTP. If special characters are sent, iRAPT strips them out.
- For Lines not used within this guide – a note states, “Skip this Line.”

- Address information for valid Commercial and Government Entity (CAGE) codes is downloaded from the System for Award Management (SAM) database.
- Address information for valid DoDAAC and Military Assistance Program Address Code (MAPAC) codes is downloaded from Defense Automatic Addressing System Center (DAASC) database.
- In every location where the system is expecting a letter code or ID code, the letters must be capitalized. For example: Yes/No responses – the “Y” or “N” must be capitalized, Product/Service ID Qualifier Codes and Transportation Method/Type Codes must also be capitalized.
- All FTP files must have the following extension: .ftp or .FTP
- When appropriate, below the Line layout, there are list(s) of values for the Fields that has identifiers. The basic import file layout is the same for all document types. For this reason, Fields that are allowed by iRAPT, but that are not used for this document type, are shaded.
- The word “must” in a Line Note implies that the Line is mandatory. The word “may” in a Line Note implies that this Line is Conditional based on the terms of the contract or the needs of the contractor.
- Minimum/Maximum allowable field sizes for all monetary fields other than Unit Price will be affected when using foreign currencies.
- The system will pad zeroes to right of the decimal point up to the number of digits allowed for a Currency Code.
- The system will drop zeroes to the right of the decimal point if they exceed the number of digits allowed for a Currency Code.
- If a non-zero number is given to the right of the maximum number of allowable decimal places as specified by the Currency Code, an error will be given.
- For currencies that allow more than 2 positions to the right of the decimal, the number of digits that may be entered left of the decimal point will be decreased to accommodate the extra digits allowed past the decimal. For instance, a monetary field that allows a maximum field size of 8.2 would allow a maximum field size of 7.3 when using a foreign currency that allows 3 decimal positions.
- For currencies that allow less than 2 positions to the right of the decimal, the number of digits that may be entered left of the decimal point will remain unchanged.
- iRAPT only accepts X12 Unit of Measure Codes.

Notes:

- MOCAS – ‘CO’ is only valid for MOCAS-paid Receiving Reports. In order to make a correction, the original MOCAS-paid Receiving Report must be in a “Correction Required” status and must be Source Inspected/Source Accepted.
- A Void transaction will not be accepted by iRAPT for the following:
 - A Receiving Report in a “Submitted” Status with a Navy ERP Ship To.
 - A Receiving Report in a “Submitted” Status with a Ship To that is signed up for a Standard Workflow – By Shipment Extract.
- For Corrected Receiving Reports, the following “key lookup data” must be included to locate the document in the database:
 - Original Contract Number (Line Number 1C)
 - Original Delivery Order Number, if assigned to the original document (Line Number 1C)
 - Original Shipment Number (Line Number 2B)

- For Void or Void & Replace documents, the following Key data elements cannot be changed:
 - Contract Number, (Line 1, Field 1)
 - Delivery Order Number, (Line 1, Field 2)
 - Shipment Number (Line 2B, Field 1)
- When FTP submissions are identified as a “Draft”, the system will process them inbound using the following minimal data set requirements:
 - Vendor CAGE
 - Contract Number Type (Defaults to DoD Contract (FAR) if not entered)
 - Contract Number
 - Delivery Order Number
 - Pay Official DoDAAC
 - Document Type
 - Routing DoDAACs depending on the document type and pay system
 - Invoice/Shipment Number depending on the document type
 - If any Line Item data is submitted, the Item No is mandatory

Once submitted as a “Draft”, all documents must be processed via the web interface using the current “Save and Continue” functionality. There will be no ability to “add to a document” via additional electronic submissions.

Notes:

- Duplicate MILSTRIPs are not allowed for Line Items.

- “NONE” can only be sent as a MILSTRIP once per Line Item and “NONE” cannot be the only MILSTRIP for a Line Item.
- MILSTRIPs are only allowed for CLIN/SLIN type Line Items (Line 15, Field 2 =1).
- If MOCAS paid or DCMA administered and “SVC” (services) is selected in Line 3, then MILSTRIP data is not used.
- For an FMS Receiving Report, it is required that there be either one MILSTRIP Document No. or one PR Number per line item. The MILSTRIP Document No. may consist of a minimum of 14 and a maximum of 15 alphanumeric characters.

1.59 Unique Identifier Header Information (UID) (Line Number 16D)

1.60 Unique Identifier Description Information (UID) (Line Number 16E) – Skip this Line

1.61 Unique Identifier Detail Information (UID) (Line Number 16F)

LOOP ID: Line Number - 15

NOTES: There may be one or more instances of Line 16F per transaction. The Line may repeat as many times as necessary.

This Line may only be used if unique identifier header information (Line Number 16D) is entered.

<i>Field</i>	<i>Description</i>	<i>Min/Max</i>	<i>Receiving Report</i>	<i>Notes</i>	<i>Type</i>
1	UID – Unique Identifier	1/50	M	The Unique Identifier that ensures uniqueness of items that are listed in the DoD UID Registry. See Unique Identifier section below for UID Type Edits.	AN
2	UID – Serial Number	1/30	C	The Enterprise assigned Serial Number corresponding to the assigned UID. The Serial Number may be within the Enterprise or within the Original Part Number. Required if UID Type is UID1 or UID2 in Field 1, Line 16D.	AN

Sample:

16F*D13499BCDEF979879880^979879880^

For additional samples, please see Line 16D.

Notes:

- For Zero Lot, the number of UIDs must balance to the Actual Quantity reported in Line 17, Field 3.
- If MOCAS paid or DCMA administered and “SVC” (services) is selected in Line 3, then UID data is not used.

Metadata Requirements
Document will be rejected if the Enterprise ID contains special characters.
No special characters, except for dashes (-) and forward slashes (/) are allowed for the Original Part Number and Serial Number. If received, the document will be rejected.
The UID may only contain uppercase English alphabet characters A – Z, no spaces allowed.

The UID may only contain numeric characters 0-9.

The UID may only contain special characters “-and “/” if contained in Original Part Number and/or Serial Number.

Field 1 – *Unique Identifier – UID Type Edits*

When the UID Type (Line 16D, Field 1) is “UID1,” concatenate the following elements in the order listed and enter on Line 16F, Field 1:

- Issuing Agency Code, Line 16D, Field 2 (Omit from concatenation if value is 0-9)
- Enterprise Identifier, Line 16D, Field 3
- Serial Number, Line 16F, Field 2

When the UID Type (Line 16D, Field 1) is “UID2,” concatenate the following elements in the order listed and enter on Line 16F, Field 1:

- Issuing Agency Code, Line 16D, Field 2 (Omit from concatenation if value is 0-9)
- Enterprise Identifier, Line 16D, Field 3
- Original Part Number, Line 16D, Field 4 Or Batch/Lot Number, Line 16D, Field 5
- Serial Number, Line 16F, Field 2

When the UID Type (Line 16D, Field 1) is “ESN,” the following must be applied and entered on Line 16F, Field 1:

- The UII must be 8 characters long.
- The UII must consist of the digits 0– 9, and the letters A– F only.

When the UID Type (Line 16D, Field 1) is “VIN,” the following must be applied and entered on Line 16F, Field 1:

- The UII must be 17 characters long.
- The UII must be composed of letters and numbers only and cannot contain the letters “I,” “O,” and “Q.”

When the UID Type (Line 16D, Field 1) is “GIAI,” the following must be applied and entered on Line 16F, Field 1:

1.62 Multiple ACRN & Price Information (Line Number 16G)

LOOP ID: Line Number - 15

NOTES: There may be one or more instances of the ACRN and price information per Line Item Loop.

Use Line 16G to report multiple ACRNs and Price Information. For One Pay, use Line 16G to report single and multiple ACRNs. Use Line 16B to report single ACRNs.

If Line 16G is used for the submission of multiple ACRNs and the Price Information, then usage of Field 1 on Line 16B is not allowed.

<i>Field</i>	<i>Description</i>	<i>Min/ Max</i>	<i>Receiving Report</i>	<i>Notes</i>	<i>Type</i>
1	ACRN	2/2	C		AN
2	ACRN Price	1/14	O	Negative amount allowed. This Field is affected by currency code. See notes below.	R10.2
	One Pay		C	If ACRN is entered in Field 1, then this Field is Mandatory.	

Samples:

16G*AA^500^

16G*AB^-300^

Notes:

- The ACRN amount total must balance with the Line Item total of the document.
- An ELIN can have only a single ACRN. The document will reject if an ELIN has multiple ACRNs.
- For One Pay, ACRN amount must be between -999,999,999.99 and 999,999,999.99 and can only contain up to 2 digits to the right of the decimal. For all other pay systems, ACRN amount must be between -9,999,999,999.99 and 9,999,999,999.99 and can only contain up to 2 digits to the right of the decimal.

Field 2 – ACRN Price

- Minimum/Maximum allowable field sizes for all monetary fields other than Unit Price will be affected when using foreign currencies.
- The system will pad zeroes to right of the decimal point up to the number of digits allowed for a Currency Code.
- The system will drop zeroes to the right of the decimal point if they exceed the number of digits allowed for a Currency Code.
- If a non-zero number is given to the right of the maximum number of allowable decimal places as specified by the Currency Code, an error will be given.
- For currencies that allow more than 2 positions to the right of the decimal, the number of digits that may be entered left of the decimal point will be decreased to accommodate the extra digits allowed past the decimal. For instance, a monetary field that allows a maximum field size of 8.2 would allow a maximum field size of 7.3 when using a foreign currency that allows 3 decimal positions.
- For currencies that allow less than 2 positions to the right of the decimal, the number of digits that may be entered left of the decimal point will remain unchanged.

1.68 Embedded UIIs/UID (Line Number 16M)**LOOP ID:** Line Number - 15 (Use Lines 16M, 16N and 16O to report Embedded UII information)

NOTE: This Line may be used to report Embedded UIIs. If this Line is used, at least one Line Number 16F is required. Line Numbers 16D through F represent a Loop for UID and can be repeated as many times as necessary. Only 100 Embedded UIIs per Parent UII are allowed regardless of the number of UII headers (Line 16D).

UID data will be ignored when submitting an Energy Receiving Report or Energy Combo.

16F*01234569^SERNUM005^
```

- Only two lines, 16F or 16O, can be present above line 16M.
- Line 16N is not used and will be ignored if entered when line 16M, Field 17 (GFP Classification) is 'Y'.
- Each 16M must have at least one following 16O before a 16F can be added.
- In this example, there are 4 UIDs present (Line 16F) and 2 Embedded UIDs present (Line 16O).
- The 3rd UID '01234566' has 2 Embedded UIDs, one Non-GFP Classification and the other GFP Classification.

```

- In this example, there are 4 UIDs present (Line 16F) and 2 Embedded UIDs present (Line 16O).
- The first UID 'D3D135SERNUM001' has one Embedded UID with GFP Classification.
- The 3rd UID 'D3D135SERNUM003' has one Embedded UID with Non-GFP Classification.

Example 3:

- Embedded UIDs are similar to Parent UIDs (Lines 16D and 16F). There can be more than one Line 16F following a Line 16D just like there can be more than one Line 16O following a Line 16M.
- In this example, there are 4 UIDs present (Line 16F) and 7 Embedded UIDs present (Line 16O).
- The first UID 'D3D135SERNUM001' has three Embedded UIDs and all of them are Non-GFP Classification.
- The 3rd UID 'D3D135SERNUM003' has four Embedded UIDs; the first 2 are GFP Classification and the last 2 are Non-GFP Classification.

1.69 Embedded Item Description (Line Number 16N)**LOOP ID:** Line Number - 15

NOTES: There may be one to 25 instances of the Embedded Item Description per Embedded UII Loop. Each instance may contain any number of characters, as long as it does not exceed the min/max requirements. The characters from each instance of the Embedded Item Description will be combined to create the complete Embedded Description for the Embedded UII Loop. The total number of characters for the complete Embedded Description may not exceed 225.

Use Lines 16M, 16N and 16O to report Embedded UII information.

<i>Field</i>	<i>Description</i>	<i>Min/Max</i>	<i>Receiving Report</i>	<i>Notes</i>	<i>Type</i>
1	Embedded Item Description	1/75	C	Mandatory for Non-GFP. Embedded Description may not exceed a combined total of 225 characters within each Embedded UII loop. The submission will fail and an error message will be sent stating that the character limit is 225 if that number is exceeded (includes spaces). Available when Embedded UII Classification is Non-GFP.
